Art Unit: 2615

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2 and 13, drawn to an electronic camera including a luminance detection, classified in class 348, subclass 349.
- II. Claims 3 and 14, drawn to an electronic camera including a strobe light, classified in class 348, subclass 371.
- III. Claims 4-8, 9 and 10, drawn to an electronic camera including a focusing monitor area, classified in class 348, subclass 350.
- IV. Claims 11 and 12, drawn to an electronic camera including a sharpness evaluation value detection, classified in class 348, subclass 354.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I, II, III or IV has separate utility such as an electronic camera that can perform a focusing function

Art Unit: 2615

based on a luminance detection, strobe light, focusing area or sharpness value. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for each of Groups I, II, III or IV is not required for each of Group I, II, III or IV, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
